

NX Installation Guide

Step-by-step instructions for downloading and installing Siemens NX on your workstation. If your installer UI looks different from these steps, reach out — we'll update the guide.

SIEMENS NX

WINDOWS X64

10 – 50 MIN

40 GB REQUIRED

BEFORE YOU BEGIN

Ensure you have at least **40 GB of free, unallocated disk space** on your workstation before starting. The installation cannot be safely paused or restarted without sufficient storage available.

INSTALLATION STEPS

1

Download the NX Installer

Navigate to the Siemens support portal and download the installer ZIP:

`SiemensNX-XXXX_wntx64.zip`

[Download from Siemens Support →](#)

2

Extract the ZIP and Run the Launcher

Once the download completes, extract the ZIP folder to a local directory, then run

`Launch.exe`.

3

Start the NX Installer

In the launcher, select **Install Designcenter NX**.

4 Work Through the Setup Wizard

Click **Next** through each of the following screens:

- Setup
- Welcome
- Custom Setup
- Language Selection
- Ready to Install

5 Enter Your License

On the **Licensing** screen, provide your license by either browsing to your license file or entering the server address in `port@hostname` format.

Note: Not sure of your license server details? Contact support@trueinsight.io before proceeding.

6 Approve the User Account Control Prompt

When the UAC dialog appears, click **Yes** to allow the installer to make system changes.

7 Wait for the Installation to Complete

The installer will run in the background. This typically takes **10 – 50 minutes** depending on your hardware.

Note: Do not cancel, close, or restart your machine during this step. When the **Completed** screen appears, click **Finish**.

Still having trouble?

Our support team can walk you through any installation issue. If your version of NX shows a different UI than these instructions describe, let us know and we'll update the guide.
